

Gaza Movement of Goods

Supplement 2: September 01-30, 2024 11 October 2024

Gaza Movement of Goods Weekly Report

1 Introduction:

Complementing to the weekly reports prepared during this month, Sebtemper 2024, this supplement provides a more comprehensive overview to the period from 01/09/2024 to 30/09/2024, allowing decision-makers and key players in the field to view the reality from a broader perspective, and work to find creative and effective solutions to the difficulties and challenges facing the flow of goods into Gaza Strip.

In this report, the month of September was divided into 4 intervals, each one represents a week and includes 7 days, except the fourth period, which includes 9 days, because the remaining two days of the month were added to it.

The main features of this period are:

- The passage of commodities to Gaza Strip was through two crossings only: Karm Abu Salem (KAS), which mainly serves the southern part of Gaza Strip, and Erez, which serves the northern part of Gaza Strip, while the Palestinian/Egiptian Rafah crossing is still completely closed.
- 2. The daily average number of entering trucks during September is only 146 trucks per day, while the average before the war was 550 trucks per day, meaning that what is currently entering constitutes about 26% of what was entering before the war.
- 3. During the entire period, 79% of the number of trucks passed through Karm Abu Salem crossing, and 21% passed through Erez crossing.
- 4. Food constituted the largest portion, at about 84% of the total number of trucks that passed into Gaza Strip during the entire reporting period.
- 5. The role of the private sector was limited to importing some food items only, while there was a dire need for many essential commodities, such as: other food items, medicines, medical supplies and equipment, clothing, footwear, hygiene materials, fuel car oil and spare parts, solar energy equipment, wood, mobile houses, and others.
- 6. The entering private sector goods conistituted about 61%, and the humanitarian aid 39% of the total trucks that entered Gaza Strip during the entire reporting period.
- 7. Market prices of basic commodities were very high, for example, tomato price in the North region of Gaza Strip reached 200 times of its prices before the war. In general, the market prices are not within the purchasing power of the vast majority of the people, especially, in light of the difficult economic conditions.
- 8. Most of the commodities are much more expensive in the North than in the South. Price of garlic in the north is about 20 times higher than its price in the south. Some goods prices are 7-12 times higher in the North than in the South (onions, sugar, potatoes, apples, peppers, tomatoes), others are about 2-6 times higher (eggs, bananas, frozen chicken, oil, cucumbers, eggplant, rice, lemons), while pasta and flour

are the only two items on the list which prices are 23% and 73% **lower** in the North than in the South, respectively.

2 Amount of entered commodities:

Table (1): Amount of trucks and tons for each week in the period.

Week	total Number of Trucks	Total Number of Tons
01-07 September 2024	1,133	23,628
08-14 September 2024	1,106	23,724
15-21 September 2024	1,011	19,066
22-30 September 2024	1,137	22,996
Total	4,387	89,414 ¹

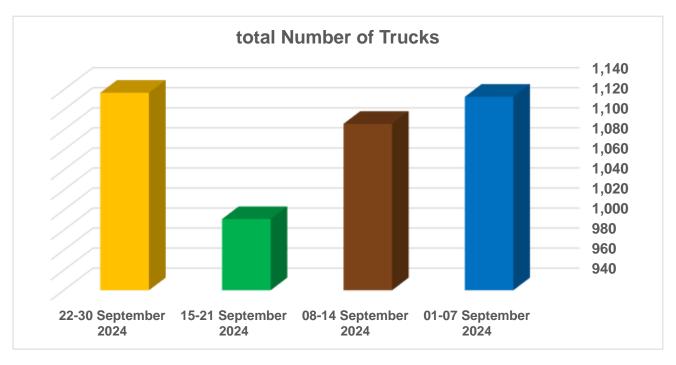

Figure (1): Number of trucks for each week.

Page 3 | 19

¹ The number of tons does not include the load of 15 trucks, which had no information about their contents in tons, these trucks had UN & NGOs equipment.

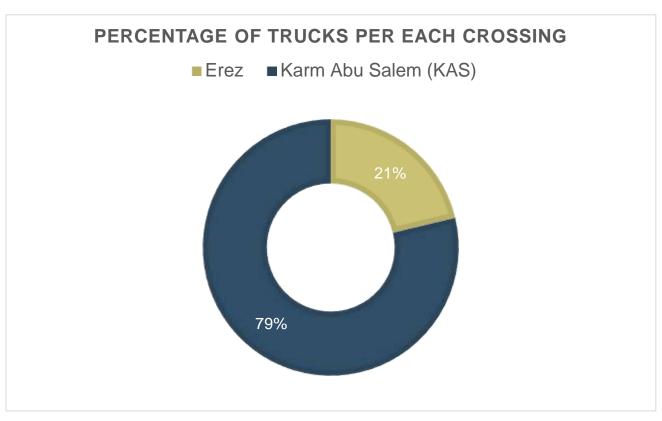

Figure (2): Percentage of trucks per each crossing

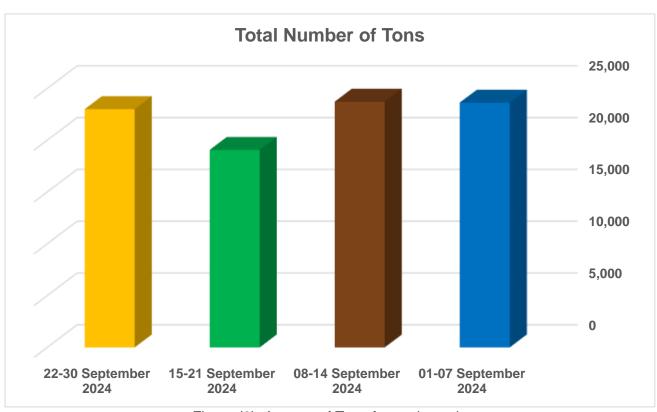

Figure (3): Amount of Tons for each week.

3 Types of entered commodities:

3.1 Types of commodities by trucks:

Table (2): Weekly nmber of trucks for each type of commodities.

Week	Medical Supplies	Shelter Equipment	Combined Aid	UN & NGOs Equip.	Fuel and Gas	Food items	Total
01-07 September 2024	15	70	7	6	42	993	1,133
08-14 September 2024	11	46	14	1	36	998	1,106
15-21 September 2024	18	114	36	1	47	795	1,011
22-30 September 2024	70	54	57	7	58	891	1,137
Total	114	284	114	15	183	3,667	4,387

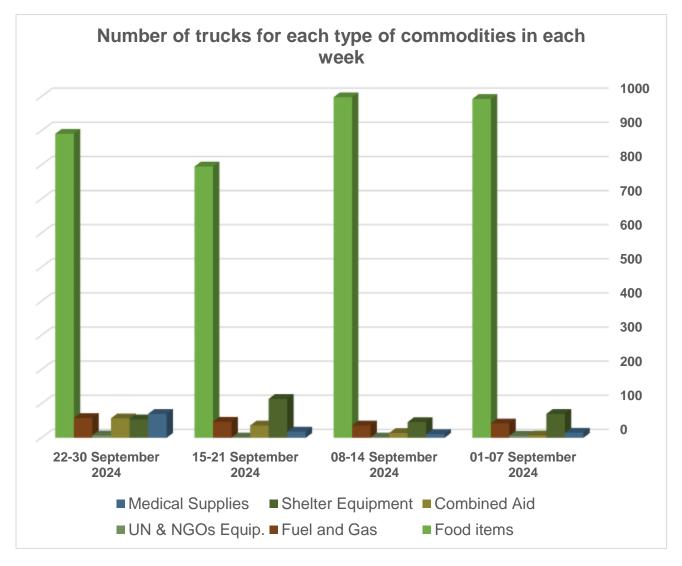

Figure (4): Number of trucks for each type of commodities in each week

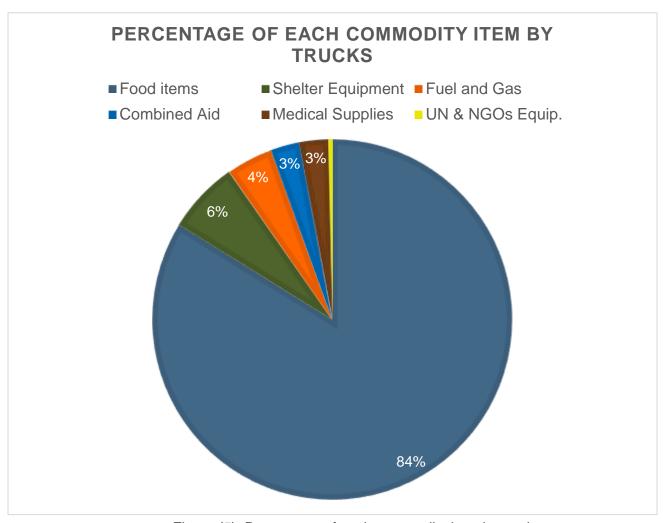

Figure (5): Percentage of each commodity item by trucks

3.2 Types of commodities by tons:

Table (3): Amount of each type of commodities in each week by tons.

Week	Medical Supplies	Shelter Equipment	Combined Aid	Fuel and Gas	Food items	Total
01-07 September 2024	200	985	110	1,143	21,190	23,628
08-14 September 2024	180	445	255	874	21,970	23,724
15-21 September 2024	200	1,150	770	1,286	15,660	19,066
22-30 September 2024	520	570	1,270	1,571	19,065	22,996
Total	1,100	3,150	2,405	4,874	77,885	89,414
